Site release integrity rail
<https://meridianverity.com/trust/site-release/>

ANTI-PHISHING

Official domain: meridianverity.com only.
 If a message claims to represent MVG but cannot be traced to the published role channels, treat as HOLD and report to security@.

security.txt:
 /.well-known/security.txt
 GPG fingerprint: 94EC8CD8863A2D0CCA
 F92990B8BF65777FC5A47F

PRIVACY (SITE DEFAULT)

No analytics, cookies, or third-party scripts by default.

RESPONSIBLE DISCLOSURE

Policy (controlling): /legal/security-disclosure/
 Targets (best effort): acknowledge <= 2 business days; initial triage <= 5 business days.
 Do not include sensitive personal data.

At-a-glance (buyer diligence)

Public-safe evidence you can replay offline. Missing proof MUST yield HOLD (fail-closed).

Canonical start	https://meridianverity.com/trust-center/
Attach 1 URL (DSSE)	https://meridianverity.com/.well-known/mvg-procurement-ticket-pack.dsse.json
Offline verifier	https://meridianverity.com/verify/ (no uploads)
Procurement kit	https://meridianverity.com/procurement/ (attachables + expected outputs)
Result semantics	PASS (verify OK) • HOLD (missing/unverifiable) • FAIL (mismatch)
Verifiable scope (public)	Deterministic receipts; site-release integrity rails; append-only transparency pointers.
Security disclosure	/legal/security-disclosure/ • /.well-known/security.txt
Verifiable contact channels	https://meridianverity.com/trust2/contact-channels/
NDA materials	Key management details; internal topology; IR runbooks; customer-specific configurations.

2-minute verification

- 1) Attach the DSSE URL to your ticket.
- 2) Verify locally (offline): use /verify/ or the air-gapped verifier kit.
- 3) Record PASS / HOLD / FAIL in the ticket (fail-closed).

Acceptance criteria

PASS: signatures verify and all referenced digests/proofs match deterministically.
 HOLD: any required signature/pointer/proof is missing or unverifiable (intentional fail-closed posture).
 FAIL: any digest/proof mismatch - escalate before proceeding.
