

Security & Responsible Disclosure Policy

Meridian Verity Group (MVG) • Version 1.0.3 • Public-safe

Report a vulnerability

Email: security@meridianverity.com (PGP available at /pgp.asc). Include impact, affected URLs/components, and minimal reproduction steps.

Good-faith testing (Safe Harbor)

- Do not access data that is not yours, and avoid unnecessary interaction with user data.
- No denial-of-service, destructive testing, or social engineering.
- Report findings promptly and allow time for remediation before public disclosure.

Response targets (best effort, not an SLA)

We aim to acknowledge reports within **2 business days** and provide an initial triage within **5 business days**.

Coordinated disclosure

We prefer coordinated disclosure. If you plan to publish, please coordinate timing with us.

Legal

This policy is for business/technical discussion only. Not legal advice. MVG may update this document; the latest version is linked from /trust and /security.txt.
